

PLANTING GUIDE

1.5 L • 6 cups | treats 12 gallons or up to 12 plants
4 L • 16 cups | treats 32 gallons or up to 32 plants

HOW MUCH?

APPLICATION CHART

Container size	Shrub Height	Deciduous Tree Height	Quantity of MYKE®	
1 gallon	0 to 11 in	0 to 29 in	125 ml	1/2 cup
2 gallons	12 to 23 in	30 to 47 in	250 ml	1 cup
3 gallons	24 to 35 in	48 to 53 in	375 ml	1 1/2 cups
5 gallons	36 to 47 in	54 to 72 in	500 ml	2 cups
7 gallons	48 to 59 in		625 ml	2 1/2 cups
10 gallons	60 to 71 in		750 ml	3 cups
15 gallons	72 to 89 in		875 ml	3 1/2 cups
20 gallons	90 to 108 in		1 L	4 cups

Caliper	Quantity of MYKE®		
25 to 40 mm	1 to 1.5 in	1 L	4 cups
41 to 50 mm	1.6 to 2 in	1.5 L	6 cups
51 to 65 mm	2.1 to 2.5 in	2 L	8 cups
66 to 75 mm	2.6 to 3 in	2.5 L	10 cups
76 to 100 mm	3.1 to 4 in	3 L	12 cups
100 mm and +	4.1 in and +	3.75 L	15 cups

FOLLOW 6 EASY STEPS

1. PLAN

Select trees that grow well in your climate and soil type. Be sure to consider the plant's hardiness zone. Each species has a different tolerance to late spring and early fall frosts, flooding, and drought.

2. PREPARE

Container grown trees and shrubs can be planted anytime from spring until fall, as long as the ground is thawed. Keep trees and shrubs protected during transport and leave them in a shaded area until planting.

3. PLANT

LARGE CALIPER TREES AND CONIFERS

- Dig a hole as deep as the root ball and twice as wide as the container or root ball.
- Completely remove all non-biodegradable packaging or, if your plant is in a tree basket with its roots wrapped in burlap, remove wire basket as well as the upper half of the burlap. In all cases, make sure not to damage the root ball.
- Loosen the soil at the bottom of the hole and fill it one-third full with good quality planting soil. Place the tree in the hole. Make sure that the top of the rootball is flush with the top of the hole.
- Apply MYKE® TREE & SHRUB, following the Application Chart and recommendations on the package. New roots must be in contact with MYKE®, so make sure to spread it all around the root ball.
- Incorporate the garden center's recommended fertilizer into the soil you'll use to fill the planting hole. Fill the hole with the soil-fertilizer mix, making sure you press firmly without compacting around the root ball.
- Finish filling the hole with the remaining soil and build up a watering ring approximately 10 to 15 cm (4 to 6 in) high all around the root ball. Fill the ring with water so it will drain down and water the roots.
- Apply 5 to 10 cm (2 to 4 in) in of mulch over the planting zone. Keep a 10 to 15 cm (4 to 6 in) in radius around the trunk free of mulch.
- Stake if necessary. Fix the trunk to the stake with a strap.

SMALL SHRUBS

Repeat the same procedure as for large caliper trees and conifers.

4. WATER

Each tree and shrub species has specific watering requirements so water them according to the garden center's instructions.

5. FERTILIZE

Use recommended fertilizers for trees and shrubs in spring and again at mid-season. Fertilizers help trees grow and withstand drought, disease, and insects.

6. PROTECT

Trees or shrubs planted in areas with little snow accumulation or at the edge of their hardiness zone may need good winter protection. Ask for details at your garden center.

MYKE®

5-YEAR WARRANTY

ON YOUR PLANT WITH A PURCHASE OF MYKE® TREE & SHRUB

TERMS AND CONDITIONS

MYKE® 5-YEAR WARRANTY PROGRAM

1. MYKE® Tree and Shrub warranty (hereinafter referred to as "MYKE® warranty") is aimed at indemnifying customers for the loss of a tree or shrub in the event of the death of such tree or shrub, subject to the terms and conditions set forth therein. For the MYKE® warranty to apply, the customer must have used the MYKE® TREE AND SHRUB product and have followed the recommendations indicated in the MYKE® Planting Guide. For the purpose of the MYKE® warranty, the term "customer" shall mean individual, excluding employees and agents acting for municipalities and cities.
2. The tree or shrub must have been planted in accordance with the planting instructions described in the MYKE® Planting Guide and in accordance with proper generally recognized horticultural usage. Notably, but not exhaustively, the customer must have respected growth requirements for trees and shrubs such as drainage, winter protection and adequate watering and must have respected the particularities of the climate zone where the tree or shrub was planted.
3. In order for the MYKE® warranty to apply, the customer shall remit to the merchant the dead tree or shrub. The customer shall also provide the original proof of purchase of the tree or shrub as well as the MYKE® TREE AND SHRUB product. **Both purchased items must appear on the same sales slip or receipt.**
4. The indemnity provided for herein is not cashable and is limited, at merchant's discretion, to: (1) replacement of the tree or shrub with same type of tree or shrub, one time only; or (2) a credit applicable on an equivalent purchase, for an amount equal to the price of the tree or shrub (excluding any other costs), up to a maximum amount of two hundred dollars (\$200) per tree or shrub.
5. MYKE® warranty only applies to trees or shrubs covered by the merchant's regular warranty, all subjected to the exclusions set forth in MYKE® warranty program.
6. MYKE® warranty doesn't replace merchant's regular warranty which shall apply exclusively during the first year following the purchase of the tree or shrub. Upon expiration of merchant's regular warranty, MYKE® warranty will apply and will be in force for a period of four (4) years, but the MYKE® warranty will expire at the latest on the fifth (5th) anniversary of the purchase of the tree or shrub. The merchant is responsible for the application of this warranty.
7. This warranty does not apply to annuals, bulbs, perennials, bare-root trees, aquatic and tropical plants, azaleas, blueberry trees and rhododendrons. Moreover, the merchant reserves the right to not include other trees or shrubs species they consider too difficult to be covered by the warranty. This warranty does not apply if the death of the tree or shrub is attributable to an incurable disease.
8. This warranty does not apply to damages caused by natural disasters or extreme weather conditions.
9. This warranty does not apply when damages to the tree or shrub were caused by the act of a person, animal or insects, or by wrongdoing, vandalism, negligence or otherwise.
