

Arize Element™

Top Lighting

Greenhouses and Indoor Farms

Arize Element™ Top lighting is a LED growing system designed to enhance Greenhouse and Indoor farming. The system delivers high light output with less heat than a HID (HPS or MH) system and provides the perfect spectrum to grow efficiently year-round.

Optimized Growth

- **Purple for Plants:** A mix of red and blue on the spectrum successfully targets plants to allow for photosynthesis and maximum absorption of light
- **Pink for Harvesting:** This broad spectrum allows workers to monitor growth
- **White for Architecture:** Mix of colored light tuned and optimized to allow for ideal growth conditions while highlighting the plant's beauty

Growth Spectrum

- **Reproductive:** Higher red content to promote flowering and fruit generation
- **Vegetative:** Higher blue content to promote healthy and thick leafy plants
- **Balanced:** Balanced red to blue ratio for overall growth

Features

- New high efficiency LEDs
- Low weight and novel hanging feature makes installation easier and less costly
- Modular design allows for LED fixture or power supply to be replaced independently
- Footprint and installation method minimizes shadowing allowing more sunlight to enter
- IP66 rated and UL wet rated
- Operating Environment: 0°C to +40°C
- L80/36,000 hours per TM-21
- 5 year limited warranty
- Negligible heat radiation when compared to HID fixture
- Impact resistant design made of polycarbonate and aluminum
- Higher PPF and Efficacy than HID
